2018 UPBM Poster Session

Event Details

This year poster's session is being held on Friday October 5th from 3:30-5pm in the Hutchison Hall Green Lounge. Expect to arrive around 3pm to set-up your presentation.

Permission Needed: Students who want to present their research in the poster session will need to obtain permission from the research mentor they collaborated their research with. Mentors will need to e-mail the [UPBM Office](#) with their permission for you to present your research in our poster session by Monday September 17th, 2018.

Making Posters / Presentations: Students may use a poster that is already made or can make poster if one is not already generated. If making a new poster many have used presentation software such as PowerPoint or Keynote to generate slides that can either be printed-out and taped individually onto a piece of foam core poster board or can be formatted to a poster layout and then sent out for printing to [The UR Graphics Center](#).

Students who choose to use the UR Graphics Center to have a poster printed should be aware that there are fees involved for doing so. The UPBM cannot absorb the costs of having the posters made. Students who want to have a poster made should check with their research mentors to see if they can help absorb the cost. If not, the slides can always be printed out and mounted on a foam core board. The UPBM Office can assist students with printing slides if needed; however, please be sure to build in a few days of turn around. The office has access to both PowerPoint and Keynote software.

What to Expect: On the day of the event students will need to arrive at least a half an hour early in order to setup their easels and to mount their posters or presentation slides onto a 40" x 60" foam core board. UPBM will furnish the easels, foam core boards, and push pins to mount their presentations. It is not necessary to cover the entire board and extra pieces of copy paper will be on hand to fill in the gaps if necessary. Presenters typically stand by their posters and give an on-the-spot explanation and field questions about their research to attendees. Need a visual? See the slide show from [2017 UPBM Poster Session](#).

Information Needed: Details are needed from each presenter to generate media and make this event happen. Please visit the following link to enter your information. Submissions are due by Monday September 17th. [UPBM Poster Session](#)
