PSC 577
Theories of Conflict

Prof. Mark Fey
Spring 2014

Syllabus & Reading List

This course examines the formal literature on conflict that has developed in the last two decades. It is meant to expose students to the techniques and models used in this line of research. The course will help graduate students identify the broad direction of international conflict studies and will also permit graduate students to pursue topics or ideas of their own interest. To that end, we set aside two classes for “model building sessions” where students can explore approaches to formalize some of the ideas in the substantive literature, or explore extensions of the current formal literature. The course covers both complete and incomplete information models and thus students must have completed PSC584 (or its equivalent) prior to taking this course.

There are three main obligations for students taking the course. Reading the required articles and participating in class is the first and most important of the obligations. The second obligation is taking a turn presenting one of the topics from the reading list. Assignments of topics will be worked out at the first class meeting. The last requirement for the course is a final paper. The two model building sessions during the semester will be focused on helping students develop their ideas for final papers.

Schedule: Starting on the next page is the list of topics and the scheduled readings for the course. Naturally, this schedule may change as the semester unfolds.
