2016 SUMMIT

dsports

PREDICT PREVENT PERFORM

at the historic Oak Hill Country Club in Rochester, NY • August 16, 2016 • 8am - 4pm

The University of Rochester, a national leader in sports medicine and data science, is organizing the inaugural dSports Summit, a day-long event focused on applying data analytics and technology to predict and prevent sports injury and optimize athletic performance.

Join notable regional and national leaders in health, data science, technology and athletics for engaging discussions and live demonstrations that showcase how data analytics and emerging innovations are put to practice.
