

Johannes Holtfreter Fellowships in Developmental, Cellular and Molecular Biology

Graduate Studies in Biology University of Rochester

The Department of Biology offers Johannes Holtfreter Fellowships for outstanding entering graduate students. While the Department of Biology still carries the name used in the days when Johannes Holtfreter conducted his classic experiments in embryology, and retains his commitment to scientific excellence and innovation, research in the Department has continued to develop, encompassing many of the most exciting areas in modern biological science: Cell and Developmental Biology, Ecology and Evolutionary Biology, Molecular Biology and Biochemistry, and Molecular Genetics.

ELIGIBILITY

All applicants with an interest in Developmental, Cellular or Molecular Biology are considered for a Johannes Holtfreter Fellowship. Strong candidates will be invited to visit the campus in February/March. Travel expenses for this purpose will be reimbursed. In addition, graduate students in residence who have made outstanding progress toward their degrees are considered each year for a Holtfreter Fellowship.

VALUE

These fellowships carry a stipend of \$30,000 (per 12 months), a full tuition scholarship and individual health insurance, and are tenable for a maximum of three years. Continuation as a Holtfreter Fellow requires continued high-level performance in graduate courses and in research, seminars and teaching.

APPLICATION

Candidates must submit an online application for admission to the graduate program in the Department of Biology at the University of Rochester. All applicants to the Ph.D. program will be considered for the Holtfreter Fellowship. The deadline for completed applications is December 1.

The University of Rochester provides equal opportunity in admissions and student aid.
