

Processing Text in Python

Sept. 9, 11, 13, 16, 18

Genesee 325

6 - 7:30pm

Instructor: Siddharth Vashishtha

Learn the basics of getting useful information from raw text using one of today's most popular programming languages!

Useful for humanists, social scientists, and engineers alike!

Appropriate for those with basic programming experience but little to no experience with text data!

...

This five-day tutorial is open to anyone who is interested, but we ask that please RSVP at: factslab.io/tutorial

Don't forget to bring a laptop!

Formal and Computational
Semantics Lab
