### INTEREST GROUP POLITICS

*Purpose*: This course principally introduces students to the political science and political economy literatures on interest groups. This includes developing an understanding of the makeup of the group system, contribution decision that help support groups, the internal politics of organizations, the strategies that groups employ and the role that they play with respect to political institutions. As the study of organized groups cuts across many subdisciplines in political science and political economy, and includes certain elements of finance and even accounting, this course might have a wide appeal.

*Requirements*: Course requirements include research presentations and a longer final paper—either original research, a detailed literature review, or a research proposal (roughly 15 pages will suffice).

Office Hours. I am located in Room 108 at Harkness (Department of Political Science/Wallis Institute of Political Economy). You can come by any time and I will see you barring extenuating circumstances. My phone number is x3-4903 and my e-mail is <a href="mailto:lawrence.rothenberg@rochester.edu">lawrence.rothenberg@rochester.edu</a>. In this odd time in which we live, zoom meetings are available—just send an email request.

Availability of Readings. Articles will be made available through Dropbox. There are several standard books that I am happy to reference—as well as extended reading readings on virtually any topic—if students would like. Additionally, if you would like a broader appreciation of what interest group scholars in Political Science do, you might consult surveying the journal *Interest Groups & Advocacy*. Also, please note that data for many of the empirical papers are data available through Dataverse.

*Grading*. Grading will reflect your class participation and your final paper (weighted approximately 1/2, 1/2).
