

CERTIFICATE PROGRAM IN STAGE MANAGEMENT

OVERVIEW

Over the last several years, the UR International Theatre Program has had particular success in its training of stage managers. Students stage managing in the Program have frequently gone on to professional careers in the field. A large measure of the success these students have achieved is due to the unique experience they have in the UR's Theatre Program: they work with a changing roster of professional directors and designers, and they have significant responsibility and autonomy running productions of which they are in charge. The Certificate in Stage Management capitalizes on these opportunities. It allows student stage managers both to follow a distinct progressive series of courses, and also to gain experience outside of the production process, leading them to be both better informed and more experienced in the multiplicity of elements that make up the theatrical event.

A Certificate Program in Stage Management is designed for students serious about pursuing a career path or an interest in stage managing for the theatre. Students should be prepared to demonstrate exceptional stage management skills and assume significant responsibilities in completing the program.
